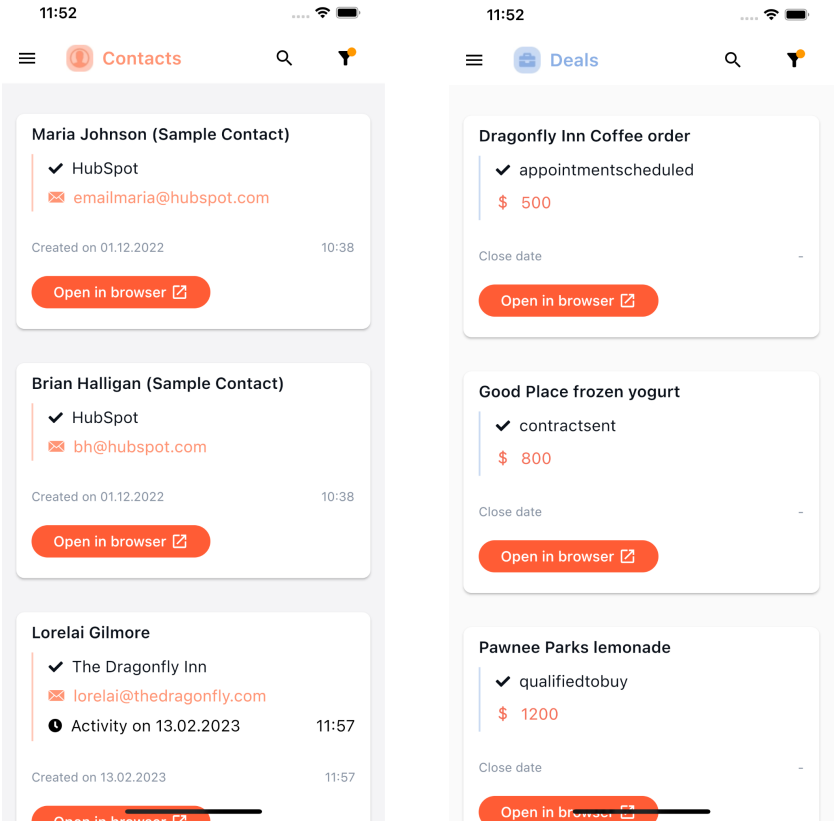
UniqPlace - mobile application developed by OPTI for HubSpot overview

OPTI launched UniqPlace which is the first free mobile application, for both Android and iOS, where you can see all your HubSpot accounts in one single place. You can check all your contacts, companies, deals and more! You can by account and search through all contacts or deals from whichever account.



As simple as it sounds, UniqPlace will improve your time management to give you a real-time summary of your accounts in one single place.

Steps to install:

1. Search in **HubSpot App Marketplace** for “UniqPlace”.
2. Install and connect it to all the **HubSpot accounts** you want to see in the mobile application. You can only see the accounts you have access to with the same email address.
3. Now go to **Manage your app**
4. Click on the button **Manage your login**
5. Set your new password for the mobile application and you will receive a confirmation by email. Later you can change your password from the same screen.
6. Done! Now you can install the **mobile application available for iOS and Android.** You can use there as credentials your email and your new password.
7. If you want to **delete** your UniqPlace account, please, before uninstalling the application from HubSpot Connected Apps, go to **Manage your login** and make sure you use the existing option to delete the account.
